Counsel,

I have attached two vr-28 reports for the 2014 House and Senate primary and runoff elections in Jefferson Davis County, Mississippi. Except as noted below, these reports identify the voters who voted in the primaries and the runoff. Birth date information is not included in the reports, but unique voter identification numbers for every voter are included. These unique voter identification numbers will easily allow you to distinguish between those voters who happen to have the same name. My understanding is that this is the reason you wanted the birth date information.

As you know, when your representatives visited the circuit clerk's office they were offered the opportunity to view the hardcopy records with the birth dates of voters obscured. Your representative declined, and insisted on that they be provided electronic records. The vr-28 reports are the electronic records. You may still view those hardcopy records, with birth dates obscured, at any time you wish.

As you may also know, representatives from the McDaniel camp did view the hardcopy records with the birth dates obscured. As I understand it, they found three voters who voted in the democratic primary, and then voted in the republican runoff. I believe these three voters are not shown in the vr-28 reports because the electronic system does not routinely capture such information. But, the electronic information is what you requested.

Please confirm receipt of these reports.

Robert E. Sanders,
Attorney for the Jefferson Davis County, Mississippi Election Commission
